## Principal Authors/Editors

The Residential Manual (*Manual*) has evolved over the years with contributions from many persons along the way. The *2001 Manual* was adapted from earlier versions in response to a mandate by the California legislature (Assembly Bill 970). This most recent version was edited and produced by [Eley Associates](#). Charles Eley wrote much of the new material and served as the technical editor. Anamika Prasad provided coordination, graphics, and document production. Content was contributed by, among others, Ken Nittler, Dee Anne Ross, Jonathan Leber, Bill Pennington, Nelson Pena, Tav Commins, and John Eash.

A number of individuals reviewed drafts of the manual and offered useful and constructive comments, including Doug Beaman, Lance DeLaura, Martyn Dodd, Gary Farber, Mike Gabel, Bill Lilly, Bill Mattinson, Bob Pond, John Proctor, Patrick Splitt, Nehemiah Stone, and Dave Ware.

Many others contributed helpful suggestions, comments and criticism. The list is so long that it is impossible to acknowledge everyone. However, their assistance is greatly appreciated.

In spite of all our efforts, omissions and errors are certain to occur. These, of course, are attributed to the authors alone. If a *Manual* user discovers an error or has a suggestion, we ask that it be brought to the attention of the Energy Efficiency Hotline. They can be reached at 1-800-772-3300 (California only) or 916-654-5106.
